

What would the November 2018 CPA Trust Fund Distribution have looked like if the new CPA revenue was included?

Predicting future CPA Trust Fund distributions is nearly impossible due to several variables that affect the revenue year-to-year. However, we can calculate approximately what CPA communities would have received in their November 2018 Trust Fund distribution had the new revenue stream had been in place. Below we compare the actual distributions from the CPA Trust Fund in November of 2018 with a new figure that shows what the impact of the new revenue would have been.

*Please note: the November 2018 figures do not include the additional funding communities received from the state budget surplus. These figures compare only the revenue generated by the old and new CPA fee structure at the state's Registries of Deeds.

What would the November 2018 CPA Trust Fund Distribution have looked like if the new CPA revenue was included?

Predicting future CPA Trust Fund distributions is nearly impossible due to several variables that affect the revenue year-to-year. However, we can calculate approximately what CPA communities would have received in their November 2018 Trust Fund distribution had the new revenue stream had been in place. Below we compare the actual distributions from the CPA Trust Fund in November of 2018 with a new figure that shows what the impact of the new revenue would have been.

*Please note: the November 2018 figures do not include the additional funding communities received from the state budget surplus. These figures compare only the revenue generated by the old and new CPA fee structure at the state's Registries of Deeds.
