

From Joe Cellucci

- Terry and I have operated J.T. Farnhams for 25 yrs. It has been a picturesque roadside clam shack for 78 yrs.
- We started in 1994 and had no issues for 10 yrs. Chief Harrell would contact us directly to alleviate any parking issues. Parking issues would only come up during the 3 months of summer, when all seasonal business are trying to capitalize on business volume.
- In 2005 Chief Silva took over, after listening to neighbor complaints he began putting no parking signs over Eben Creek referring to it as a bridge. Enclosed is a MASS Highway Dept. determination that it is not a bridge. Signs continued to be installed on multiple occasions resulting in vgly/excess signage. Most recently stripes were painted.
- We gathered 500 signatures (Enclosed) of locals supporting the continued parking across the street. We also met with a sympathetic Senator Tarr who did not want to see our business adversely affected by eliminating any parking. The State Depts and State Police had no issues with the parking saying it was up to the discretion of the local jurisdiction to ticket or not.
- We would hope that the town would support, not harass our business understanding that the parking can be difficult during the summer season. Our customers are unfairly ticketed except during weekends like "ART in the Barn" during which no tickets are given.
- We would also ask the town to consider removing some redundant signs to improve the view of a very scenic stretch of roadway.

Thank you

Joe & Terry Cellucci

RE: Eastern Ave. / Ebben Creek, Essex

Dear Ms. Cellucci:

Please be advised that the structure that carries Eastern Ave. (Rte. 133) over Ebben Creek in Essex does not meet the federal definition of a bridge.

Attached is a copy from the Federal Highway Administrations "Recording and Coding Guide for the Structure Inventory and Appraisal of the Nation's Bridges" which includes the definition of a bridge. Note that a structure is considered a bridge if it spans at least 20 feet (6.1 meters). Our records indicate that the structure that you inquired about has a length of only 1.8 meters.

If you have any questions regarding this matter, contact Brian B. Clang at (617) 973-7763.

Sincerely,

Alexander K. Bardow, P.E.
Director of Bridges and Structures
